SUMMARY

Research scientist with 4+ years of academic experience. I work in an area between machine learning, natural language processing and text-mining. My research concerns the development of new methods to identify short phrases in the text of a document such that those phrases best capture the topics of the target document. I have developed several methods which benefits the indexing in scholarly. I am well connected in the academic community and have been presenting my work/tutorials to various natural language processing and data mining conferences.

EDUCATION

Doctor of Philosophy, Computer Science University of North Texas, Denton, Texas	<i>January 2015 - Present</i>
Master of Science, Databases University of Bucharest, Bucharest, Romania	<i>2008 - 2010</i>
Bachelor of Science, Computer Science and Mathematics University of Bucharest, Bucharest, Romania	<i>2004 - 2008</i>

TECHNICAL STRENGTHS

Programming Languages	Python, Java, LaTeX, C++, MySQL, MATLAB
Software & Tools	TensorFlow, Keras, Weka, Hadoop

EXPERIENCE

Research Assistant <i>University of North Texas, Denton, Texas</i>	January 2015 - Present
--	------------------------

- Developed keyphrase extraction systems for extracting keyphrases from scholarly documents; This extraction task aids indexing of documents in digital libraries, and hence, leads to improved organization, search, retrieval, and recommendation of scientific documents.
- Developed a feature learning framework for automatically discover patterns that keyphrases express.
- Developed a domain-independent supervised keyphrase extraction systems based on the learned representations.
- Developed a ranking model to keyphrase extraction, such that the model can rank keyphrases according to their degree of representing the topic of a target document.

Computer Science Teacher <i>I. L. Caragiale High School, Bucharest, Romania.</i>	January 2015 - April 2015
--	---------------------------

- Worked in a team of six people and came up with a model of Dragon with movable wings
- Taught programming languages (C++, SQL, PL/SQL, PHP)
- Designed lecture plans
- Evaluated students performance

FELLOWSHIPS & GRANTS

Scholarship from American Association for Artificial Intelligence

Travel Grant from Women in Machine Learning

Toulouse Graduate School(TGS) Tuition Benefit Scholarship

ACADEMIC SERVICE

Manuscript peer review, Natural Language Engineering Journal

Manuscript peer review, Transactions on Knowledge Discovery from Data

Manuscript peer review, Language Resources and Evaluation

PROFESSIONAL AFFILIATIONS

Association for Computing Machinery (ACM)

Association for the Advancement of Artificial Intelligence (AAAI)
